Lista de Precios 2017

Effast from Polypipe Italia is a well-established brand name that is recognised throughout both the industrial process market and construction industries for its market-leading range of thermoplastic pipework systems suitable for use within industrial applications. The company now provides these components to customers all over the world and leads the way in the research and development of advanced new solutions that satisfy the specific needs of the market.

Polypipe, with its large UK based manufacturing capabilities, has developed Effast's comprehensive product portfolio such that it now offers a proven and effective solution to virtually any requirement. No matter the project, the Effast range can offer the perfect combination of pressure pipe fittings, ball, butterfly, diaphragm and actuated valves, compression joints, adaptors and other fittings. Normally available in different standards, these products are suited to many different commercial applications in such areas as food and beverage processing, chemical manufacture, water treatment and agriculture.

Outstanding performance and reliability have come to represent the hallmarks by which Polypipe's Effast products are recognised and with these products also carrying BSI Kitemark accreditation and conforming to various other Quality european standards (KIWA, NF, KIWA UNI, DVGW, WRAS, GOST) they can be specified with complete confidence. Polypipe Italia is certified ISO 9001 and ISO 14001: 2015.

Dedicated to supporting its customers at every stage, the company also complements its products and systems with a full technical information and support service, while a nationwide distribution network means that products are readily available, even when needed next day.

For further information please see our contact details on the back cover of this brochure.

Il marchio EFFAST è presente da molti anni sul mercato ed è molto apprezzato e riconosciuto sia per le applicazioni di tipo industriale sia per le applicazioni proprie del campo delle costruzioni civili e dell'agricoltura.

I raccordi e le valvole a marchio EFFAST sono prodotti in Italia e sono venduti nel mondo avendo come riferimento la soddisfazione dei Clienti, se necessario anche attraverso la ricerca e lo sviluppo di soluzioni personalizzate.

Il Gruppo Polypipe, produttore della più ampia gamma di sistemi di tubazione in plastica, ha costantemente investito nella propria consociata Polypipe Italia così da farla diventare un'azienda di qualità, capace di offrire una soluzione valida per ogni tipo di esigenza. In effetti, qualunque progetto o applicazione riferita a impianti in pressione trova nella gamma EFFAST una perfetta combinazione di raccordi, valvole a sfera, valvole a farfalla, valvole a membrana, valvole motorizzate, giunti rapidi, adattatori ed altro ancora. Tutti i prodotti a marchio EFFAST sono disponibili in diversi standard e sono adatti per essere utilizzati nei processi dell'industria alimentare così come in quelli dell'industria chimica, del trattamento acque e dell'irrigazione.

Il prodotti EFFAST sono certificati con i principali marchi di qualità (BSI, KIWA, NF, KIWA UNI, DVGW, WRAS) e la Polypipe Italia è un'azienda certificata ISO 9001 (certificazione di sistema) ed ISO 14001: 2015 (certificazione ambientale); la Qualità caratterizza quindi i prodotti di un'azienda che vuole offrire ai propri Clienti la massima affidabilità e la migliore conformità alle specifiche di progetto.

La missione della Polypipe Italia si completa offrendo un costante sostegno ai propri Clienti nell'offrire loro tutte le necessarie informazioni di natura tecnica e garantendo altresì un ottimo servizio di consegna.

Il dettaglio dei nostri contatti è nell'ultima pagina di questo Listino.

POLYPIPE ITALIA

Situated 40 kms away from Genova with a 2500 m² covered warehouse, a production unit of 24 machines for a total of 50 people, Polypipe Italia has now become an important producer of fittings and valves for high pressure pipe systems in PVC , ABS, and PPH polyfusion materials. Our products are distributed all over the Italian market through a wide network of highly qualified representatives and exported all around the world through specialist distributors.

MARKETS

Our products are sold through wholesalers & distributors in the water treatment, swimming pool & spa business, building & construction sector, agriculture & irrigation installations, industrial applications in all type of pressure piping systems.

Effast fittings and valves are easy to install, corrosion resistant, cover a wide range of temperature and have an excellent chemical resistance.

SERVICE

Our medium delivery time for export is 3 weeks thanks to a constant control over a good level of stock and a dedicated staff who always guarantee you good service for good value.

Our commercial team will assist you in a very professional way on both technical and logistics matters, and on price quotations.

POLYPIPE ITALIA

Situata a 40 km da Genova, con un magazzino di 2500 m² coperti, un'unità di produzione di 24 macchine ed un totale di 50 persone, Polypipe Italia è ormai diventata un importante produttore di raccordi e valvole per sistemi di tubazioni a pressione in PVC, ABS, e PPH.

I nostri prodotti sono distribuiti in tutto il mercato italiano ed esportati in tutto il mondo attraverso agenti e distributori specializzati.

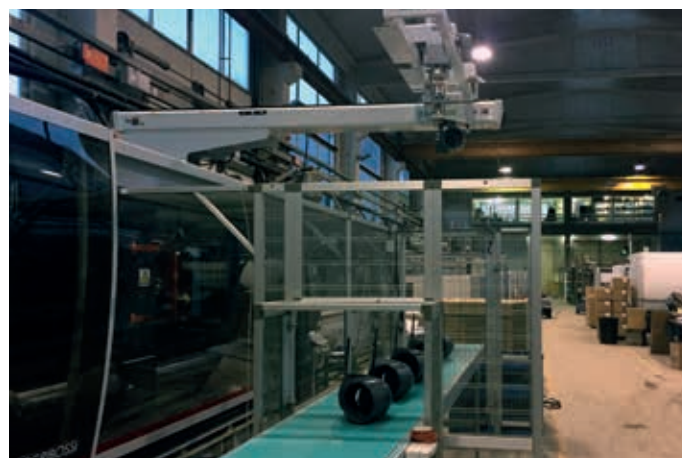

MERCATI

I nostri prodotti vengono impiegati nei settori trattamento acque, piscina e wellness spa, agricoltura e impianti di irrigazione, nelle applicazioni industriali e in tutti i sistemi di tubazioni a pressione. I raccordi e le valvole EFFAST sono facili da installare, resistenti alla corrosione, a diverse temperature e sollecitazioni chimiche.

SERVIZIO

I tempi di consegna per l'Italia sono di 7 giorni e per l'esportazione sono di 3 settimane, grazie alla gestione costante del livello di stock.

Il nostro team commerciale è a vostra disposizione per soddisfare ogni richiesta tecnica, logistica e per lo studio di quotazioni personalizzate.

QUALITY

Our internal laboratory tests directly the complete range of production according to the regulations of all main European norms (NF, KIWA, UNI, KITE MARK, DVWG). Effast ball and industrial valves are tested one by one against leakage, and the complete range of our products is been tested by our internal laboratory department. All Effast fittings and valves are produced with certified compound raw material which guarantees full security on mechanical and pressure resistance and is fit for contact with alimentary fluids and potable water. The O'rings used in valves are certified materials: EPDM, FKM, NBR. Polypipe Italia is an ISO 14001 certified company.

QUALITÀ

Il nostro laboratorio interno effettua giornalmente test sull'intera gamma prodotta secondo i regolamenti di tutte le principali norme europee (NF, KIWA UNI, KITE MARK, DVGW) e tutte le valvole industriali sono testate singolarmente contro le perdite. I raccordi e le valvole EFFAST sono prodotti con materie prime certificate che garantiscono la sicurezza sulla meccanica e resistenza alla pressione e sono idonei al contatto con liquidi alimentari e acqua potabile. Gli o-rings utilizzati sono in materiali certificati: EPDM, FKM, NBR. Polypipe Italia è una società certificata ISO 14001.

WORKING CONDITIONS

Fittings and valves of this price list are for PVC, PPH, ABS, PE joints and fluids in pressure, in particular for water supply, until PN/PFA 16 (unless differently specified).

PVC fittings and valves can be used for sewerage too, but never for compressed air systems. For application with aggressive fluids or different temperatures from what indicated, please ask for information.

STANDARDS REFERENCES

Standards of this price list are valid and updated to the date of their publication.

UNI EN 1452: 2010

CONDIZIONI DI UTILIZZO

I raccordi e le valvole inclusi nel presente listino sono destinati alla giunzione di tubi in PVC, PPH, ABS, PE e al convogliamento di fluidi in pressione, in particolare acqua per qualsiasi uso, fino a PN / PFA 16 (se non diversamente indicato).

I raccordi e le valvole in PVC possono essere impiegati anche per linee non in pressione ma non possono essere utilizzati per impianti ad aria compressa. Per utilizzi con fluidi particolarmente aggressivi, o temperature differenti da quelle indicate, richiedere informazioni in azienda.

CONNECTION AMONG DIFFERENT TYPES OF PRESSURES

All the components in this price list, according to the standard UNI EN 805, for water supply distribution, have three different working types of pressure: PN / PFA, PMA e PEA.
For each PN/PFA meaning there is a correspondence for PM and PEA, on the basis of the following table:

CORRELAZIONE TRA LE DIFFERENTI PRESSIONI

I componenti, valvole e raccordi, in accordo con la norma UNI EN 805, per la distribuzione di acqua, hanno 3 pressioni di utilizzo: PN / PFA, PMA e PEA.
A ciascun valore di pressione PN / PFA sono associati i valori di pressione PMA e PEA, secondo la seguente tabella:

Operating Temperature and Pressure / Temperatura e Pressioni di Esercizio

	PN / PFA (PN)	PMA	PEA
Pressures in bars / Pressioni in bars	16	20	24
	10	12,5	15
	6	7,5	9

Imperial and Metric Sizes / Sistema Metrico e British Standard

IMPERIAL AND METRIC SIZES

The following notes may be helpful to those unfamiliar with the different ways of describing metric and imperial sizes when specifying pipe or fittings. When specifying Imperial pipe fittings and other components reference is made to the nominal size of the pipe bore in inches and fractions of an inch. Metric Systems are specified by reference to the outside diameter of the pipe expressed in millimetres.

As a general guide, the following table gives a comparison between metric and imperial sizes up to 8 inches. It is important to understand that metric sizes are not simply inch sizes which have been converted into millimetres and called metric. The actual equivalents are slightly different (except for Imperial size 2 1/2 inches and metric size 75mm and 5 inches and 140mm which happen to coincide exactly) and are not interchangeable.

Imperial Sizes (inches)		Metric Sizes (mm)	
Nominal bore	Pipe outside diameter	Pipe outside diameter	Nominal bore
3/8"	17.1	16	10
1/2"	21.4	20	15
3/4"	26.7	25	20
1	33.6	32	25
1 1/4"	42.2	40	32
1 1/2"	48.3	50	40
2	60.3	63	50
2 1/2"	75.2	75	65
3	88.9	90	80
4	114.3	110	100
5	140.2	140	125
6	168.3	160	150
8	219.1	225	200

Max Working in Kg/cm² / Pressione Massima di Utilizzo Kg/cm²

Range / Serie	Dimensions / Dimensioni	PN
Solvent jointing	from D 16 to D 160	16
Solvent jointing	from D 200 to D 315	10
Threaded	from G 3/8" to G 4"	16
Adaptor	from D 16 to D 110	16
Ball Valves	from D 216 to D 63	16
Ball Valves	from D 75 to D 110	10

PN / PFA / PN - Allowable continuous operating pressure

Maximum pressure that a component is capable to maintain in continuous operating (UNI EN 805:2002).

At the temperature of 20°C and operating for 50 years, it remains the same as the marked PN rating.

PMA – Maximum operating pressure

Maximum operating pressure is the pressure occurring from time to time, including surge, that a component is capable of withstanding in service (UNI EN 805:2002).

PEA - Allowable Site Test Pressure

Test pressure that must not be exceeded during commissioning. In general, it should be assumed that all pipe systems will be subjected to a proof hydraulic pressure test at 1.5 times the nominal pressure rating PN of the lowest rated component in the system (UNI EN 805:2002).

PVC-u

Unplasticized Polyvinyl Chloride - High quality compound with a MRS (Minimum Required Strength) of 25N/sq.mm at least.

ABS: Acrylonitrile Butadiene Styrene

PPH: Homopolymer Polypropylene

PE 100: High Density Polyethylene (HDPE) – MRS10

EPDM: Ethylene-Propylene Diene Monomer

FKM: Fluoropolymer elastomer

PTFE: Polytetrafluoroethylene

NBR: Nitrile rubber

BS: British Standard

Rp: Female thread according to UNI EN 10226

R: Male thread according to UNI EN 10226

G: Cylindrical thread UNI EN ISO 228

d: External size of the pipe

DN: Nominal size

D: Inner rubber size

PACKAGING:

Pack: pieces in standard pack

Min. q.ty.: minimum quantity that can be ordered

JIS: Japanese standard

ASTM: American standard

NPT: threaded American standard

PN / PFA / PN - Pressione di esercizio ammissibile

Massima pressione idrostatica che un componente è capace di mantenere in servizio continuo (UNI EN 805:2002).

Alla temperatura di 20° C e per 50 anni di servizio corrisponde alla definizione di PN.

PMA - Massima pressione di esercizio ammissibile

Massimi picchi occasionali di pressione (inclusi i disturbi dovuti a sovrappressioni), che un componente è in grado di resistere in servizio (UNI EN 805:2002).

PEA - Pressione di collaudo ammissibile

Massima pressione idrostatica che un componente nuovo, una volta installato, è capace di mantenere per un periodo di tempo relativamente corto, allo scopo di assicurare l'integrità e la tenuta della condotta (UNI EN 805:2002).

PVC-u

Polivinilcloruro non plastificato - Materia prima di elevata qualità in grado quindi di superare test che ne determinano un MRS (Minimum Required Strength) almeno pari a 25 N/mm²

ABS: Acrilonitrile Butadiene Stirene

PPH: Polipropilene Omopolimero

PE 100: Polietilene Alta Densità (HDPE) – MRS10

EPDM: Copolimero Etilene Propilene

FKM: Gomma fluorurata

PTFE: Politetrafluoroetilene

NBR: Gomma nitrilica

BS: British Standard

Rp: Filettatura interna cilindrica UNI EN 10226 – a tenuta sul filetto

R: Filettatura esterna conica UNI EN 10226 – a tenuta sul filetto

G: Filettatura cilindrica UNI EN ISO 228

d: Diametro esterno del tubo

DN: Diametro Nominale

D: Diametro interno gomma

IMBALLAGGI:

Pack: numero dei pezzi per confezione standard

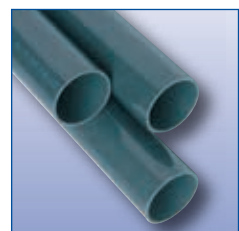

Q.tà min.: quantità minima per confezione non frazionabile

JIS: standard giapponese

ASTM: standard americano

NPT: standard americano filettato

Flowmeters / Débitmètres / Durchflussmesser Flussimetri / Caudalímetro

Working Operation

The flow meter operates on the float principle and is used for flow rate measurements in closed pipelines. The medium flows through the vertically installed flow meter from bottom to top. This raises the float and shows the current flow rate on the scale on the measuring device. The read-off edge corresponds to the largest diameter of the float.

The flow meters come as standard with a water scale and a % scale, and two set-point indicators.

Special features

- Fracture-proof and corrosion-resistant
- Radially removable
- Special adhesive scales for liquid and gaseous media
- Holder for accessories (limit value contacts)
- Measuring tube carries the DN label, and also the measuring range and material
- PVDF floats and stops as standard
- Measuring ranges 1.5 – 15.000 l/h

Funzionamento

Il flussimetro funziona sul principio del galleggiante e viene utilizzato per misure di portata in tubazioni chiuse. Il fluido scorre attraverso il flussimetro installato in verticale dal basso verso l'alto. Così facendo solleva il galleggiante e mostra la portata corrente sulla scala del dispositivo di misurazione.

I misuratori di portata sono equipaggiati di serie con una scala indicante la portata e una scala indicante la %, e due indicatori set-point.

Caratteristiche

- Resistente alla corrosione e agli urti
- Rimovibile radialmente
- Scale di portata speciali per liquidi e sostanze gassose
- Supporto per accessori
- Tubo graduato con indicazione della portata e del DN
- Galleggianti e Stops in PVDF come standard
- Range di misura 1.5 – 15000 l/h

Effast-Tite is a solution of polyvinyl in a mixture of solvents containing tetrahydrofuran to cement PVC pipes and fittings developed with a special solvent that evaporates fast. When flexible pipes are cemented, please wait at least one hour. For immediate testing use maximum 3 bars after twenty minutes (up to 160 mm).

For flexible pipe joint waiting at last 1 hour

La colla Effast-Tite è una soluzione di polivinile in una miscela di solventi che contengono tetraidrofurano (TFH) per incollare tubi e raccordi in PVC sviluppata con un solvente speciale che evapora velocemente. Quando i tubi flessibili sono incollati aspettare un'ora per l'essiccazione. Per una prova immediata non usare più di 3 bar dopo 20 minuti (fino a 160 mm). Per incollaggi con tubi flessibili attendere almeno un'ora

Large-Tite is developed with special solvents that evaporate slowly. Pressure testing after 24h (above 10°). Do not use this solvent cement below 5°C, during the first 10 minutes do not charge mechanically.

Large-Tite è sviluppata con un solvente che evapora lentamente. Il test di pressione deve essere effettuato dopo 24 ore (sopra i 10°C), non usare questa colla sotto i 5°C, durante i primi 10 minuti non caricare meccanicamente.

Performance

Essential characteristics Caratteristiche essenziali	Performance	Standard reference Normativa di riferimento
Shear Strength		
At 1 hour setting time	≥ 0,4 MPa	
At 24 hour setting time	≥ 1,5 MPa	
At 480 + 96 (60oC) hour setting time	≥ 7,0 MPa	
applications for PN 16 (Nominal Pressure 16 bar)		EN 14814
Pressure resistance at 51,2 bar / 20 oC	≥ 1000 hour, no leakage	
Pressure resistance at 16 bar / 60 oC	≥ 1000 hour, no leakage
